Portland Global Sustainable Evergreen Fund Portland Global Sustainable Evergreen LP

DECEMBER 31, 2025

OVERVIEW

The investment objectives of Portland Global Sustainable Evergreen Fund (the Trust) and the award winning Portland Global Sustainable Evergreen LP (the Partnership) (collectively, the Funds) are to preserve capital and provide above-average long-term returns.

The Trust ultimately intends to achieve its investment objective by investing all, or substantially all, of its net assets in the Partnership, although Portland Investment Counsel Inc. (the Manager) may from time to time determine that the investment objective of the Trust can be best achieved through direct investment in underlying securities and/or investment in other pooled investment vehicles. To the extent the Trust makes direct investments, it will apply the investment strategies of the Partnership.

The Partnership may invest in a portfolio of private securities, either directly or indirectly through other funds consisting of: private equities believed to be in sustainable systems including farmland; private equities in renewable energy and energy efficiency; other equity or debt securities, a portion of which may have provisions resulting in equity ownership of the issuer of the debt or the underlying asset if certain events occur; and complementary public securities. The Partnership may borrow up to 20% of the total assets after giving effect to the borrowing.

The Manager intends to invest some of the Partnership's assets in investment products directly or indirectly managed by specialty investment managers which it believes have disciplined investment philosophies that are similar to its own (a Specialty Investment Manager). The Manager decides whether the Partnership invests in a fund managed by a Specialty Investment Manager and the extent of the commitment to that fund; but does not decide on the individual investments, which will comprise that Specialty Investment Manager's fund.

Current Specialty Investment Managers are Bonnefield Financial Inc. (Bonnefield), which manages the Bonnefield Canadian Farmland LP V (Bonnefield LP V), and the European Investment Fund (EIF) and its sister institution the European Investment Bank (EIB), which provide institutional support for the Global Energy Efficiency and Renewable Energy Fund (GEEREF).

Bonnefield LP V is an open-ended fund targeted at institutional and accredited investors. Bonnefield believes that many of the investors are interested in gaining exposure to the attractive attributes of Canadian farmland, such as its ability to hedge against inflation and its low correlation with stocks, bonds, and traditional real estate.

The Partnership invests in GEEREF indirectly through an investment in Portland Global Energy Efficiency and Renewable Energy Fund LP (Portland GEEREF LP). GEEREF's objective is to invest in Regional Funds (as defined in the offering memorandum of Portland GEEREF LP) that invest their assets in projects and companies involved in energy efficiency and renewable energy, which enhance access to clean energy in developing countries and economies in transition.

As at September 30, 2025, Bonnefield LP V's assets under management were \$376 million, having acquired 70 investment properties across 5 provinces, totaling 45,881 title acres under management via 53 farmland tenants. The Partnership has committed to invest \$2,350,000 in Bonnefield LP V and as at December 31, 2025, this commitment has been paid in full.

Portland GEEREF LP made commitments to invest a total of €14,250,000 in B Units of GEEREF. As at December 31, 2025, Portland GEEREF LP has invested €13,654,966 representing 95.82% of its commitment.

As of September 30, 2025, GEEREF had committed approximately €200 million in 15 Regional Funds, while having liquidated and realized about €6.28 million, €20.55 million, and \$14.82 million from three Regional Funds, Emerging Energy Latin America Fund II LP, Solar Arise India Projects Private Limited, and Armstrong South East Asia Clean Energy Fund LP, respectively. The portfolios of the 12 remaining Regional Funds comprise 192 investments. 11 of the 12 remaining Regional Funds have begun the process of divesting.

For more information, please visit Portland GEEREF LP's website at <https://portlandic.com/geeref>.

FINANCIAL HIGHLIGHTS

The Trust's return from December 31, 2024 to December 31, 2025 was 5.42% for Series A and 6.65% for Series F units. The Trust has delivered annualized and cumulative returns since inception on March 29, 2018 for Series A units of 5.23% and 48.47% and since inception on February 28, 2018 for Series F units of 6.37% and 62.20%, respectively.

The Partnership's return from December 31, 2024 to December 31, 2025 was 5.82% for Series A and 7.03% for Series F units. The Partnership has delivered annualized and cumulative returns since inception on July 31, 2018 for Series A units of 5.95% and 53.52% and since inception on April 30, 2018 for Series F units of 6.96% and 67.59%, respectively.

As at December 31, 2025, the Trust was 99.4% invested in the Partnership.

As at December 31, 2025, the asset allocation of the Partnership was 87.4% in Bonnefield LP V, 13.2% in Portland GEEREF LP, and (0.6%) in cash and other liabilities.

The fair value of Bonnefield LP V will include annual appraisals of the underlying assets completed on a quarterly rolling basis. Bonnefield has been successful in introducing annual rental rate escalators across many of the new and renewed leases in 2025, while maintaining strong tenant relationships and high rent collection levels.

FUND AWARDS

The Partnership finished in 1st place in the 2025 Canadian Hedge Fund Awards for the Best 1 and 3 Year Return and 3rd place for Best 5 Year Return in the private equity category.*

In 2024, the Partnership finished in 2nd place at the Canadian Hedge Fund Awards for the Best 3 Year Return and 2nd place for Best 5 Year Return, and in 2023 the Partnership finished in 2nd place for the 1 Year Return, 2nd place for Best 3 Year Return and 2nd place for Best 5 Year Return in the private equity category.*

The Trust was awarded the winner of a 2021 Wealth Professional 5-Star award for one of Canada's top ESG Funds.**

RECENT DEVELOPMENTS AND OUTLOOK

While 2025 has been marked by geopolitical uncertainty and trade-related noise, the resilience and adaptability of Canadian agriculture remained evident. Increased volatility in the market along with elevated interest rates and soft commodity prices have generally led to more conservative capital spending by farmers and tempered land acquisition activity, moderating valuation increases across the country. Trade tensions may continue to create uncertainty; however, in recent years, Canadian producers have increasingly diversified export markets toward Europe, Asia, and the Middle East, reducing reliance on more volatile trading partners, a trend that is likely to continue. Farm cash receipts rose in 2025, supported by strong yields and efficient harvest conditions, helping offset the impact of softer commodity pricing on farm-level cash flows. Increased domestic demand for Canadian agricultural products, including canola and fresh produce has also provided support, helped by expanding domestic processing capacity and “Buy Canadian” consumer sentiment.

Canadian farmland resilience is driven by a combination of factors, including the supply of available farmland remaining tight, particularly when it comes to high-quality land in premium farming regions, while the demand from a growing worldwide population, combined with years of geopolitical and climate change induced production challenges, have resulted in declining global stocks-to-use ratios for most agricultural commodities. Consumers around the world will need Canadian crops, regardless of U.S. tariffs and trade disruptions. Bonnefield is seeing increased demand for lease financing as farmers focus on liquidity and capital preservation, thereby working with Bonnefield to gain access to additional acreage to support their growth, rather than farmers absorbing additional land onto their balance sheet. This shift has reduced competition in certain markets, presenting attractive acquisition opportunities. Despite near-term headwinds, the long-term fundamentals of Canadian agriculture remain strong, supported by growing global food demand and Canada’s reputation for high-quality, reliable, sustainable production. Bonnefield remains well positioned to deploy capital, targeting assets that offer both yield and long-term value growth.

The operating environment for renewable energy projects across the regions in which GEEREF projects are located was struck by the COVID-19 pandemic and the cyclical headwinds that followed from rising interest rates by Central Banks. These headwinds have delayed the divestment timelines from the Regional Funds, and whilst we have recognized the value of deferring divesting to await better prices, the Partnership continues to push for an increased pace of divesting. GEEREF was originally scheduled to terminate in November 2023 and was extended by two years to November 2025 following investor approval in June 2023. In May 2025, the European Investment Bank proposed a further extension to allow additional time to complete delayed asset divestments, however, this proposal was not unanimously approved and GEEREF entered liquidation on November 6, 2025. The liquidation process is expected to continue through to 2030, with assets realized as expeditiously as practicable and in the best interests of investors. GEEREF intends to pay distributions, and given the structural protections for B shareholders, the Manager expects the 4% preferred return to be achieved while proceeds are distributed. Portland will continue to actively monitor the liquidation process and advocate for timely realizations and special distributions to unitholders. As the regional funds in GEEREF continue to progress through their respective harvesting phases and distribute proceeds from dispositions, Portland GEEREF LP will continue to return funds to investors via special distributions.

A distinguishing feature of the Funds is sustainable investing and holding private investments. Overall, we believe that the Funds are currently well positioned to meet its investment objectives for the medium to long term, which by the nature of the underlying investments are expected to hold little correlation to the publicly traded markets. The following pages highlight our belief in the attractiveness of investing in Canadian farmland.

The Case For Canadian Agriculture

We believe Canadian agriculture is poised to benefit from several macroeconomic, environmental, and demographic trends that will impact the world’s food supply in the years and decades ahead. Increasing supply through farming additional land across the world appears to have limited potential because most productive land has already been brought into production. Existing land also faces major threats from overproduction, soil degradation, urbanization, climate change, and water insecurity, exacerbating the already strained supply situation.

Canada’s resource wealth in water, arable land, petroleum, and potash, in addition to relatively favorable climate trends, have allowed Canadian farmland to fare relatively well. Canada’s access to both Pacific and Atlantic trade and proximity to the U.S., position it as a world leader in agricultural trade. Also, Canada’s well-established trade infrastructure allows easy access to world markets, further improving Canada’s advantage in terms of market access. The Manager believes that, as incomes and population continue to rise in emerging economies, Canada’s surplus of sustainable productive agricultural land will prove a valuable economic resource.

The increasingly capital-intensive nature of today’s farm operations requires significant economies of scale to maximize profitability. A new generation of family farmers and progressive, growth-oriented farmers are acquiring and operating larger tracts of farmland and need access to new sources of financing to help them grow and maximize their efficiency. This trend, along with significant succession challenges experienced by the large number of older farmers facing retirement across Canada, has led to a growing demand for alternative sources of capital among Canadian farmers. We believe these trends are likely to persist and will continue to add pressure to an already precarious global supply and demand scenario.

A Bonnefield property in Northern New Brunswick

Food Supply Disruptions

Global food security remained fragile in 2025, driven by persistent geopolitical tensions, climate volatility, and macroeconomic uncertainty. The long-term repercussions of the Ukraine-Russia war continue to disrupt agricultural supply chains, while extreme weather events related to climate variability contributed to prolonged drought and flooding in key agricultural areas, and conflict-driven instability in regions such as the Middle East, parts of Africa and South America exacerbate local food access challenges.¹ Although global food prices have broadly moderated since the 2022 peak, declines have not been evenly transmitted to low-income, import-dependent countries, leaving food security risks elevated for vulnerable populations.

Since Bonnefield's inception, a strong conviction in the strength and resilience of Canadian farmers along with a belief that Canadian agriculture is well-positioned to feed an ever-growing global population have been fundamental to how we share Bonnefield's view about this unique asset class. As we see the impacts of sustained challenges in global trade and supply chains, geopolitical turmoil and disruptions, and the effects of a changing climate on food production around the world, Canada's role as a major exporter of key food products has drawn significant attention on the world stage. Consider the following examples as of 2025: Canada is the world's largest oats exporter (55% of world share), the largest rye exporter (56% of world share), and the third largest wheat exporter (13% of world share).² These exports are evidence of Canada's robust agricultural sector, in a world where food and commodity security have been volatile and susceptible to global conflict.

Responsible Investing at Bonnefield Today

When founding Bonnefield, the company's principals established a set of corporate and social responsibility principles to guide its investing activities. These responsible investing (RI) principles are rooted in a set of core operating guidelines that put farmers and farming first.

Bonnefield's ultimate goal is to promote sound farmland management practices, help improve operator efficiencies and protect the integrity of Canadian farmland, which we believe are core to protecting and enhancing long-term returns for our investors.

The core RI principles that govern Bonnefield's businesses are:

- They preserve Canadian farmland for farming use.
- They do not buy land for non-agricultural redevelopment.
- Their agronomic standards must balance exemplary farmland stewardship, sustainable farming practices and affordable farming operations.
- They aspire to become a long-term partner with our Canadian farm operator clients.
- Their programs must assist Canadian farm operators to build or maintain scale, become more profitable, improve cash flow and/or reduce debt.
- They will not dictate to our farm operator clients how to operate their farms.
- The farmland lease programs must create an "as if owned" relationship with the leased land for the farm operator.

In accordance with the best practices of responsible investing guidelines, Bonnefield has adopted robust governance structures for its farmland funds. Bonnefield's funds have investor advisory committees that, among other tasks, confirm net asset values based on independent third party property appraisals. The advisory committees are also mandated to respond to any matter that may result in a conflict of interest, deviations from stated investment policies and/or distribution policies.

A Bonnefield property in Southwestern Ontario

Bonnefield's RI framework, as detailed in their Task Force on Climate- related Financial Disclosures (TCFD) report, outlines key investment risks and opportunities that arise from climate change.

The first source of risk and opportunity discussed in Bonnefield's assessment lies within the economic transition to a low carbon economy. Policy risks relating to reducing green house gas (GHG) emissions are identified as having the potential of increasing operating costs, and market risks that could have a similar impact on costs resulting from pressure on Bonnefield tenants to adopt regenerative agriculture practices. Bonnefield does not expect either risk to impact fund valuations, as other factors such as the resulting reduction in input costs and improved efficiencies would counteract the impact of the cost increases. Bonnefield also identifies key opportunities from the economic transition to a low carbon economy as

policy and technological opportunities, which include increasing demand for carbon offsets that could create a potential source of revenue that is uncorrelated with tenant rents, and technological breakthroughs simplifying high-tech farming practices, such as AI-driven "big-data" driving continuous operational improvement.

The second source of risk and opportunity discussed in Bonnefield’s assessment is from the physical impact of changing weather. Acute weather events are identified as both a risk and an opportunity, with the risk arising from increased incidents of heavy rainfall inundation, extreme heat waves, and hail increasing the potential for crop damage, soil erosion, uninsured losses and diminished asset values in high-risk locations. The opportunity, however, arises from Bonnefield’s focus on assets that are located in regions where extreme weather impacts that are less likely and have site characteristics that protect from extreme weather damage; characteristics that would be of increasing demand in acute weather events. Chronic weather patterns are similarly identified as both a risk and opportunity, with the risk arising from droughts, increased weather variability and unpredictability, rising average temperatures and heat stress, and increased precipitation increasing the potential damage to crops and assets, increased disease and fungus, and reduced asset values in high-risk locations. Canada’s traditionally cold climate does however present opportunities for increasing farm productivity and the amount of arable land, arising from increasing average temperatures, the extended number of growing days, and an increasing ability to grow high-value crops.

Bonnefield Metrics: Sustainably Managed Land

Bonnefield has established a set of farming best practices aimed at promoting sustainable farming operations and environmental responsibility. These best practices, referred to as the Bonnefield Standards of Care, are included in every Bonnefield lease and cover a range of sustainable management practices including:

- ✓ Periodic Soil Testing
- ✓ Tillage Systems In Keeping With Soil Conservation
- ✓ Crop-Rotation Systems
- ✓ Surface Water And Water-Course Management
- ✓ Detailed Record Keeping
- ✓ Crop Planning
- ✓ Pesticide Management And Weed Control
- ✓ Soil-Erosion Practices
- ✓ Environmental Obligations

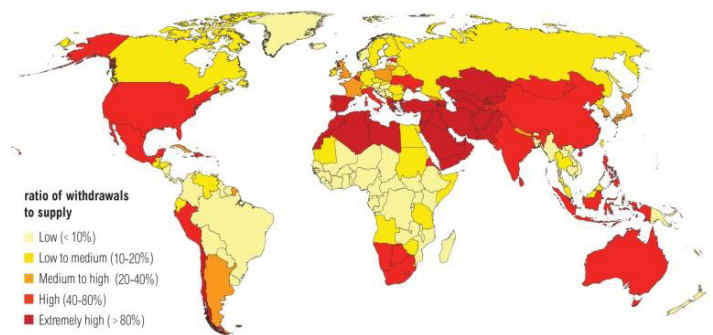

By implementing, and investing in, sustainable practices that prioritize soil health, farmers help mitigate the impacts of extreme weather events and ensure the long-term viability of their operations. In each of the last five years, at least 98% of Bonnefield farmland has been sustainably managed,³ as assessed by third-party agrolgists, compared to approximately 65% of farms across Canada reported using sustainable farming practices in the most recent Census of Agriculture data.⁴

Water Usage and Water Quality

Canada boasts a significant water resource advantage relative to other parts of the globe, with approximately 20% of the world’s freshwater reserves.⁵ Estimates suggest that approximately 11% of existing cropland globally could be vulnerable to lost productivity due to water scarcity by 2050. In contrast, it is thought that only 1% of Canada’s cropland is potentially vulnerable.⁶ Water scarcity is a major challenge for agricultural systems around the world, as depicted by the World Resource Institute’s Water Stress by Country analysis.⁷

Despite Canada’s enviable access to freshwater, it is critical to ensure appropriate management of water resources as well as ensuring appropriate water drainage is maintained on farmland in order to prevent soil erosion and degradation of overall soil quality. Each year, third party agrolgists evaluate whether any parcels of Bonnefield’s farmland are experiencing drainage issues. Those without are deemed to have passed Bonnefield’s water quality test. In 2024, 95.6% of Bonnefield’s farmland passed this water quality test, the same as in 2023.

Water Stress by Country: 2040

NOTE: Projections are based on a business-as-usual scenario using SSP2 and RCP8.5.

Regional Insights on Farmland Values

2025 has underscored the increasing sophistication of many Canadian farmers, with their diversified and vertically integrated business models, which contribute to greater resilience in their day-to-day operations. Many producers manage mixed operations that combine cash crop production with livestock farming. Some generate supplementary income through surface leases or renewable energy sources such as wind and solar. The vertically integrated nature of some of the operators enables tighter control over margins and enhances operational efficiency. This level of diversification positions the operators well to navigate current macroeconomic pressures and commodity market volatility.

Despite near-term trade uncertainty, we believe Canadian agriculture remains fundamentally strong. Canadian farmland continues to offer a compelling investment thesis grounded in stable, uncorrelated returns, limited volatility relative to other asset classes, and long-term supply/demand imbalances in global food markets. Tariffs may bring temporary volatility, but they do not alter the long-term drivers of farmland value. Periods of market disruption often create attractive entry points. In a sector that has historically suffered from underinvestment, the current environment presents an opportunity to deploy capital that enhances productivity, supports farmers, and drives long-term value creation.

A Bonnefield property in Southern Ontario

Central to Bonnefield’s approach is establishing long-term relationships with leading growth-oriented Canadian farmers and providing these farmers with capital to help:

- i) reduce debt, improve cash flow, and improve return on assets;
- ii) finance expansion, growth, productivity, and profitability;
- iii) facilitate succession and transition of farming operations from retiring farmers to a younger generation and/or;
- iv) secure long-term access to farmland on an ad-hoc basis; all while protecting farmland for farming.

Bonnefield has increased the number of farmers with whom they operate from 86 in 2018 to 121 in 2024. Bonnefield also supports the communities in which they operate through various donations and engagement opportunities. They have long been a proud supporter of Food and Water First, a citizen coalition dedicated to protecting Ontario’s Class 1 farmland and source water region.

Promoting Environmental and Climate Sustainability

Metric	2024	2023	2022	2021	2020	2019
Percentage of acreage owned longer than one year with annual property inspection completed by the asset manager	100%	100%	100%	100%	100%	100%
Percentage of acreage with formal title search and review completed to verify chain of ownership	100%	100%	100%	100%	100%	100%
Assets passing water quality test	95.6%	95.6%	96.9%	92.6%	95.5%	94.9%

Bonnefield became the first farmland investment manager and property manager in Canada to qualify and be accepted as a signatory to the United Nations-supported Principles for Responsible Investment (PRI) Initiative, an international network of investors working to put responsible investment into practice and to promote sustainability.

Bonnefield’s leadership in responsible investing was recognized through their achievement of a perfect absolute grading (100 out of 100) and a five-star rating in their 2024 PRI assessment, a reflection of Bonnefield’s approach to continuous improvement of their policies and processes.

Signatory of:

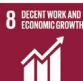

SUSTAINABLE DEVELOPMENT GOALS

Sustainable Development Goals (SDGs) are a universal call to action to end poverty, protect the planet and ensure that all people enjoy peace and prosperity. It consists of a set of 17 global goals (highlighted below) spearheaded by the United Nations to tackle the root causes of poverty and unite its members together to make a positive change for both people and planet.⁹

GEEREF IMPACT OVERVIEW

GEEREF has mapped its portfolio investments against SDGs. It showed that GEEREF's investment focus on building-up new clean energy capacity in developing countries and its two-fold impact approach – the combination of enforcement of EIB standards on the project-level and measurement of impact – contribute to the achievement of four of the 17 goals.

GEEREF'S DIRECT SDG CONTRIBUTION	GEEREF'S METRICS	GEEREF'S EXPECTED IMPACT (as at December 31, 2023)
<p>GEEREF BUILDS UP NEW CLEAN ENERGY CAPACITY</p> 	<p>Capacity Installed (GW²) Electricity Generated and Saved (GWh²)</p>	<p>1.6 GW in development, 0.4 GW in construction, 3.1 GW in operation 8,856 GWh of electricity generated and 151 GWh of electricity saved</p>
<p>GEEREF CONTRIBUTES TO DECREASING GHG EMISSIONS IN ENERGY AND OTHER INDUSTRIES</p> 	<p>Emissions reduced (tonnes of CO₂ eq)</p>	<p>4.12M tonnes of CO₂ equiv. avoided by operational projects per year</p>
<p>GEEREF CREATES EMPLOYMENT OPPORTUNITIES AND SKILLS TRAINING</p> 	<p>Number of People Employed: temporary, permanent, male, female Training delivered (hours)</p>	<p>7K permanent male jobs 4K permanent female jobs 24K temporary male jobs 11K temporary female jobs 194K training hours</p>
<p>GEEREF IS A PUBLIC-PRIVATE PARTNERSHIP</p> 		

THANK YOU

Thank you for investing in the Trust and the Partnership. We recognize that in recent years there is an ever increasing number of 'green' or 'ESG' or 'impact' investing opportunities. We believe we have made an allocation of capital to two sustainable industries, farmland and renewable energy, that will continue to grow in value over the medium to long term and benefit our planet and its people.

*The Canadian Hedge Fund Awards are based solely on quantitative performance data of Canadian hedge funds with Fundata Canada managing the collection and tabulation of the data to determine the winners. There is no nomination process or subjective assessment in identifying the winning hedge funds. The 2023 awards are based on 264 Canadian hedge funds to June 30, 2023, the 2024 awards are based on 273 Canadian hedge funds to June 30, 2024, and the 2025 awards are based on 291 Canadian hedge funds to June 30, 2025.

**Wealth Professional reached out to its network of advisors across Canada and asked that they name the fund providers who were delivering the best ESG Funds based on a combination of reflection of values, track record, security selection, fees and fund manager performance.

Management's Responsibility for Financial Reporting

The accompanying financial statements of Portland Global Sustainable Evergreen Fund (the Trust) and Portland Global Sustainable Evergreen LP (the Partnership) (collectively the Funds) have been prepared by Portland Investment Counsel Inc. (the Manager) in its capacity as manager of the Funds. The Manager of the Funds is responsible for the information and representations contained in these financial statements. The Board of Directors of the Manager, in its capacity as trustee of the Trust, and Board of Directors of the general partner of the Partnership, Portland General Partner (Ontario) Inc., have approved these financial statements.

The Manager maintains appropriate processes to ensure that relevant and reliable financial information is produced. The financial statements have been prepared in accordance with IFRS Accounting Standards (IFRS) as issued by the International Accounting Standards Board (IASB) and include certain amounts that are based on estimates and judgments. The significant accounting policies which management believes are appropriate for the Funds are described in note 3 to each of these financial statements.

The financial statements have been audited in accordance with Canadian generally accepted auditing standards. The auditor report that expresses their opinion on the financial statements is attached.

INDEPENDENT AUDITOR'S REPORT

To the Unitholders of Portland Global Sustainable Evergreen Fund

Opinion

We have audited the financial statements of Portland Global Sustainable Evergreen Fund (the Fund), which comprise:

- the statement of financial position as at December 31, 2025
- the statement of comprehensive income (loss) for the year then ended
- the statement of changes in net assets attributable to holders of redeemable units for the year then ended
- the statement of cash flows for the year then ended
- and notes to the financial statements, including a summary of material accounting policies

(Hereinafter referred to as the “financial statements”).

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2025, and its financial performance and its cash flows for the year then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board.

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards. Our responsibilities under those standards are further described in the “**Auditor’s Responsibilities for the Audit of the Financial Statements**” section of our auditor’s report.

We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

KPMG LLP, an Ontario limited liability partnership and member firm of the KPMG global organization of independent member firms affiliated with KPMG International Limited, a private English company limited by guarantee. KPMG Canada provides services to KPMG LLP.

Other Information

Management is responsible for the other information. Other information comprises:

- the information included in the Fund commentary document.

Our opinion on the financial statements does not cover the other information and we do not and will not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit and remain alert for indications that the other information appears to be materially misstated.

We obtained the information included in the Fund commentary document as at the date of this auditor's report. If, based on the work we have performed on this other information, we conclude that there is a material misstatement of this other information, we are required to report that fact in the auditor's report.

We have nothing to report in this regard.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian generally accepted auditing standards will always detect a material misstatement when it exists.

Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements.

As part of an audit in accordance with Canadian generally accepted auditing standards, we exercise professional judgment and maintain professional skepticism throughout the audit.

We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion.

The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

	NET ASSETS ATTRIBUTABLE TO HOLDERS OF REDEEMABLE UNITS		\$ 2,909,471	100.0%

1. GENERAL INFORMATION

Portland Global Sustainable Evergreen Fund (the Trust) is an open-end investment fund established under the laws of the Province of Ontario as a trust pursuant to an amended and restated master declaration of trust dated as of December 13, 2013, as amended thereafter and as may be amended and restated from time to time. The formation date of the Trust was February 9, 2018 and inception date was March 29, 2018 for Series A and February 28, 2018 for Series F and O. Portland Investment Counsel Inc. (the Manager) is the Investment Fund Manager, Portfolio Manager and Trustee of the Trust. The head office of the Trust is 1375 Kerns Road, Suite 100, Burlington, Ontario L7P 4V7. These financial statements were authorized for issue by the Board of Directors of the Manager on March 31, 2026. The financial statements of Portland Global Sustainable Evergreen LP (the Partnership) are included and are to be read in conjunction with these financial statements.

The Trust offers units to the public on a private placement basis under an offering memorandum. The investment objective of the Trust is to preserve capital and provide above average long-term returns. Although the Trust intends to achieve its investment objective by investing all, or substantially all, of its net assets in the Partnership, the Manager may from time to time determine that the investment objective of the Trust can be best achieved through direct investment in underlying securities and/or investment in other pooled investment vehicles. To the extent, the Trust makes direct investments, it will apply the investment strategies of the Partnership. The investment objective of the Partnership is to preserve capital and provide above average long-term returns by investing in a portfolio of private securities, either directly or indirectly through other funds, initially in private equities believed to be in sustainable systems including farmland and renewable energy and energy efficiency.

The statements of financial position of the Trust are as at December 31, 2025 and 2024. The statements of comprehensive income (loss), changes in net assets attributable to holders of redeemable units and cash flows are for the years ended December 31, 2025 and 2024. The schedule of investment portfolio is as at December 31, 2025.

2. BASIS OF PRESENTATION

These financial statements have been prepared in compliance with IFRS Accounting Standards (IFRS) as issued by the International Accounting Standards Board (IASB). The financial statements have been prepared under the historical cost convention, as modified by the revaluation of financial assets and financial liabilities at fair value through profit or loss (FVTPL).

3. SUMMARY OF MATERIAL ACCOUNTING POLICIES

Financial instruments

(a) Classification

The Trust classifies financial assets based on the business model used for managing such financial assets and the contractual cash flow characteristics of those financial assets. The Trust may be divided into sub-portfolios that have different business models. Where contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding (SPPI test), the financial asset will be classified as a financial asset at amortized cost.

The Trust recognizes financial instruments at FVTPL upon initial recognition, inclusive of transaction costs in the case of financial instruments not measured at fair value. Purchases and sales of financial assets are recognized as at their trade date. The Trust classifies its investments in equities and fixed income securities as financial assets or financial liabilities at FVTPL. Other investment funds (the Partnership) held by the Trust do not meet the SPPI test and therefore have been classified as financial assets at FVTPL.

All other financial assets and liabilities are recognized at amortized cost and are reflected at the amount required to be paid, discounted to reflect the time value of money when appropriate.

The Trust's obligation for net assets attributable to holders of redeemable units does not meet the criteria for equity treatment and therefore are presented as a liability on the statement of financial position. The Trust classifies its obligations for net assets attributable to holders of redeemable units as financial liabilities at FVTPL.

The Trust's accounting policies for measuring the fair value of its investments are similar to those used in measuring net asset value (NAV) for unitholder transactions; except for items attributable to a difference between the valuation methodology applied under IFRS and the methodology applied for trading purposes, the treatment of organization expenses, and/or differences in the month end NAV and financial statement date. Refer to Fair Value Measurement for a description of the methodology applied under IFRS. Organization expenses are deductible from the NAV over a five-year period commencing at such time as the Manager shall determine and such expenses were fully deductible in the first year of operations under IFRS. There is a comparison of NAV per unit and net assets attributable to holders of redeemable units per unit within note 11.

Financial assets and liabilities may be offset and the net amount reported in the statement of financial position when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

In the normal course of business, the Trust may enter into various master netting agreements or similar agreements that do not meet the criteria for offsetting in the statement of financial position but still allow for the related amounts to be set off in certain circumstances, such as bankruptcy, certain events of default or termination of the contracts.

(b) Recognition, de-recognition and measurement

Purchases and sales of financial assets are recognized on their trade date - the date on which the Trust commits to purchase or sell the investment. Financial assets and liabilities are initially recognized at fair value. Subsequent to initial recognition, all financial assets and liabilities at FVTPL are measured at fair value. Unrealized gains and losses arising from changes in fair value of the FVTPL category are presented in the statement of

comprehensive income (loss) within 'Change in unrealized appreciation (depreciation) on investments' in the period in which they arise. Financial assets at amortized cost are subsequently measured at amortized cost, less any impairment losses. Transaction costs incurred on financial assets or liabilities at amortized cost are amortized over the life of the asset or liability.

Financial assets are de-recognized when the rights to receive cash flows have expired or the Trust has transferred substantially all the risks and rewards of ownership. Upon disposal, the difference between the amount received and the average cost to acquire the financial asset (for financial assets at FVTPL) or amortized cost (for financial assets at amortized cost) is included within 'Net realized gain (loss) on investments' in the statement of comprehensive income (loss).

Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value of financial assets and liabilities traded in active markets (such as publicly traded marketable securities) are based on quoted market prices at the close of trading on the reporting date. The Trust uses the last traded market price for both financial assets and financial liabilities where the last traded price falls within that day's closing bid-ask spread. In circumstances where the last traded price is not within the bid-ask spread and the difference is material, the Manager determines the point within the bid-ask spread that is most representative of fair value based on the specific facts and circumstances. If there has been no trade, the mid-price (average bid and asking price) as of the close of the business on the reporting date is used to approximate fair value. The Trust's policy is to recognize transfers into and out of the fair value hierarchy levels as of the date of the event or change in circumstances giving rise to the transfer.

Investments held by the Partnership, in other investment funds, are valued based on the latest available net asset value of those investment funds. The Partnership reviews the details of the reported information obtained from the investment funds and considers:

- the liquidity of the investment funds or their underlying investments;
- the value date of the NAV provided;
- restrictions on redemptions;
- the basis of accounting and, in instances where the basis of accounting is other than fair value, fair value information provided by the investment funds and/or their investment managers.

The Manager has procedures to determine the fair value of securities at FVTPL for which market prices are not readily available or which may not be reliably priced. The Partnership does not trade on an active market hence its fair value is determined using valuation techniques. The fair value is primarily determined based on the latest available price of the Partnership as reported by the administrator of the Partnership.

Revenue recognition

'Interest for distribution purposes' shown on the statement of comprehensive income (loss) represents the stated rate of interest earned by the Trust on fixed income securities accounted for on an accrual basis, as applicable. The Trust does not amortize premiums paid or discounts received on the purchase of fixed income securities. Dividends on equity investments are recognized as income on the ex-dividend date. Redemption fees earned by the Trust as detailed under note 6 are presented as 'Securityholder redemption fees' and are recognized upon the redemption date of the units on the statement of comprehensive income (loss).

Foreign currency translation

The Trust's subscriptions and redemptions are denominated in Canadian dollars, which is also its functional and presentation currency. Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates that transactions occur. Assets and liabilities denominated in a foreign currency are translated into the functional currency using the exchange rate prevailing at the reporting date. Foreign exchange gains and losses related to assets and liabilities at amortized cost are recognized in profit and loss and are presented as 'Foreign exchange gain (loss) on cash and other net assets' on the statement of comprehensive income (loss). Realized foreign exchange gains and losses related to investments are recognized when incurred and are presented in the statement of comprehensive income (loss) within 'Net realized gain (loss) on investments'.

Unrealized exchange gains or losses on investments are included in 'Change in unrealized appreciation (depreciation) of investments' in the statement of comprehensive income (loss).

'Foreign exchange gain (loss) on cash and other net assets' may arise from sale of foreign currencies, currency gains or losses realized between trade and settlement dates on securities transactions, and the difference between the recorded amounts of dividend, interest and foreign withholding taxes and the Canadian dollar equivalent of the amounts actually received or paid.

Cash and cash equivalents

The Trust considers highly liquid investments with an original maturity of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value to be cash equivalents. Cash is comprised of deposits with financial institutions.

Cost of investments

The cost of investments represents the cost for each security excluding transaction costs for investments at FVTPL. On the schedule of investment portfolio, transaction costs have been deducted in aggregate from the total cost of individual investments which includes transaction costs.

Redeemable units

The Trust has issued multiple series of redeemable units, which are redeemable at the holder's option and do not have identical rights. Redeemable units can be put back to the Trust at any redemption date for cash equal to a proportionate share of the Trust's NAV attributable to the unit series. Units are redeemable quarterly upon 60 days' notice.

The redeemable units are carried at the redemption amount that is payable at the statement of financial position date if the holder exercises the right to put the units back to the Trust.

Redeemable units are issued and redeemed at the holder's option at prices based on the Trust's NAV per unit at the time of issue or redemption. The Trust's NAV per unit is calculated by dividing the net assets attributable to the holders of each series of redeemable units by the total number of outstanding redeemable units of each respective series. Refer to note 6 for additional details on redeemable units.

Redemption notes

In certain circumstances, the Trust may issue promissory notes equal to the redemption proceeds with a term of not more than five years from the date of issue (Redemption Notes). Redemption Notes bear an interest rate that is equal to the Bank of Canada overnight rate, reset each year as at January 1, simple interest per annum, calculated from the day the Redemption Note is issued and such other commercially reasonable terms as the Manager may prescribe. Redemption Notes may be prepaid in part or full at any time at the option of the issuer prior to maturity, without notice, bonus or penalty, as determined in the sole discretion of the Manager, provided that the applicable interest shall be paid at the end of the term of the Redemption Note. The total payable balance of Redemption Notes and applicable interest are included in 'Redemption notes' on the statement of financial position.

Interest on Redemption Notes are recorded on an accrual balance.

Expenses

Expenses of the Trust including management fees and other operating expenses are recorded on an accrual basis.

Transaction costs associated with investment transactions for financial assets and liabilities at FVTPL, including brokerage commissions, have been expensed on the statement of comprehensive income (loss).

Interest charged on margin borrowing is recorded on an accrual basis.

Organization expenses

Organization expenses including legal fees, time spent by the Manager to create the Trust, and registration fees associated with the formation of the Trust are recoverable from the Trust by the Manager. The Trust is required to re-pay the Manager in equal installments over 60 months commencing on the next valuation date after the NAV reaches \$2.5 million, or at such other time or amount as the Manager in its absolute discretion shall determine. Organization expenses are included as 'Organization expenses' on the statement of comprehensive income (loss) as they occur.

Increase (Decrease) in net assets attributable to holders of redeemable units per unit

'Increase (Decrease) in Net Assets Attributable to Holders of Redeemable Units per Unit' in the statement of comprehensive income (loss) represents the Increase (Decrease) in Net Assets Attributable to Holders of Redeemable Units per Series, divided by the weighted average units outstanding of that series during the reporting period.

Distributions to unitholders

Distributions will be made to unitholders only at such times and in such amounts as may be determined at the discretion of the Manager. The Trust will distribute sufficient net income and net realized gains to unitholders annually to ensure that the Trust is not liable for ordinary income taxes. All distributions by the Trust will be automatically reinvested in additional units of the Trust held by the investor at the NAV per unit thereof, unless the investor notifies the Manager in writing that cash distributions are preferred.

Allocation of income and expense, and realized and unrealized gains and losses

Management fees and other costs directly attributable to a series are charged to that series. The Trust's operating expenses, income, and realized and unrealized gains and losses are generally allocated proportionately to each series based upon the relative NAV of each series.

Allocation of non-cash items on the statement of cash flows

The Trust includes only the net cash flow impact and does not include non-cash switches between series of the Trust that occurred during the year in 'Proceeds from redeemable units issued' or 'Amount paid on redemption of redeemable units.' For the year ended December 31, 2025, there were no non-cash switches that have been excluded from the Trust's operation and financing activities on the statement of cash flows (December 31, 2024: \$194,649).

Future accounting changes

IFRS 18 will replace IAS 1 Presentation of Financial Statements and applies for annual reporting periods beginning on or after January 01, 2027. The new standard introduces the following key new requirements:

- Entities are required to classify all income and expenses into five categories in the statement of comprehensive income (loss), namely the operating, investing, financing, discontinued operations and income tax categories. Entities are also required to present a newly defined operating profit subtotal. Entities' net profit will not change.

- Management defined performance measures (MPMs) are disclosed in a single note in the financial statements.
- Enhanced guidance is provided on how to group information in the financial statements.

In addition, all entities are required to use the operating profit subtotal as the starting point for the statement of cash flows when presenting operating cash flows under the indirect method.

The Trust is still in the process of assessing the impact of the new standard, particularly with respect to the structure of the Funds' statements of comprehensive income (loss), statements of cash flows and the additional disclosures required for MPMs. The Trust is also assessing the impact on how information is grouped in the financial statements.

4. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS

The preparation of financial statements requires management to use judgment in applying its accounting policies and to make estimates and assumptions about the future. The following discusses the most significant accounting judgments and estimates the Trust has made in preparing these financial statements.

Fair value of Underlying Funds

The fair value of Underlying Funds that are not quoted in an active market is determined primarily in reference to the latest available price of such units for each Underlying Fund, as determined by the administrator of such Underlying Fund. The Trust may make adjustments to the reported net asset value of various Underlying Funds based on considerations such as the value date of the price provided, cash flows (calls/distributions) since the latest value date, the estimated total return reported by the manager of the Underlying Fund if a price is unavailable, restrictions on redemptions and the basis of accounting, if not at fair value. The carrying values of Underlying Funds may be materially different to the values that could be realized as of the financial reporting date or ultimately realized on redemption.

Classification of financial assets and liabilities

Financial assets may be classified as financial assets at amortized cost, financial assets at FVTPL or financial assets at fair value through other comprehensive income (loss). Financial liabilities may be classified as financial liabilities at amortized cost or financial liabilities at FVTPL. In order to classify its financial assets and liabilities in accordance with IFRS 9, the Manager uses judgment to assess the business model of the Trust and the cash flows of their financial assets and liabilities. The classification of financial assets and liabilities of the Trust are outlined in note 3.

5. FINANCIAL INSTRUMENTS

(a) Risk management

The Trust's investment activities may be exposed to various financial risks, including market risk (which includes price risk, interest rate risk and currency risk), liquidity risk and credit risk. The Trust invests in the Partnership, which may invest in other funds (the Underlying Funds) and is therefore susceptible to the market risk arising from uncertainties about future values of those Underlying Funds. The Manager makes investment decisions after an extensive assessment of the Underlying Funds, their strategies and the overall quality of the Underlying Funds' manager. All of the Underlying Funds and their underlying investments are subject to risks inherent in their industries. In the case of the Underlying Funds, established markets do not exist for these holdings, and are therefore considered illiquid. The Trust is therefore indirectly exposed to each financial risk of the respective Underlying Fund in proportion to its investments in such Underlying Fund. The Trust's risk management goals are to ensure that the outcome of activities involving risk is consistent with the Trust's investment objectives and risk tolerance per the offering memorandum. All investments result in a risk of loss of capital.

Price risk

Price risk is the risk that the fair value or future cash flows of financial instruments will fluctuate due to changes in market prices (other than those arising from interest rate risk or currency risk). Financial instruments held by the Trust are susceptible to market price risk arising from uncertainties about future prices of the instruments.

If the price of the investments held by the Trust on December 31, 2025 had been higher or lower by 10%, net assets attributable to holders of redeemable units of the Trust would have been higher or lower by \$292,086 (December 31, 2024: \$292,581). Actual results may differ from this sensitivity analysis and the difference could be material. The Trust has indirect exposure to price risk through its investment in the Partnership.

Interest rate risk

Interest rate risk arises on interest-bearing financial instruments having fixed interest rates held by the Trust, such as bonds and borrowings. The fair value and future cash flows of such instruments will fluctuate due to changes in market interest rates. As at December 31, 2025 and, 2024, the Trust did not have exposure to interest rate risk.

Currency risk

Currency risk is the risk that the value of a financial instrument will fluctuate due to changes in foreign exchange rates. Securities included in the Trust may be valued in or have exposure to currencies other than the Canadian dollar and when measured in Canadian dollars, be affected by fluctuations in the value of such currencies relative to the Canadian dollar. As at December 31, 2025 and, 2024, the Trust did not have material exposure to currency risk.

Liquidity risk

Liquidity risk is the risk that the Trust will encounter difficulty in meeting their obligations associated with financial liabilities. The Trust's exposure to liquidity risk is concentrated in the cash redemption of its units. The Trust provides investors with the right to redeem units quarterly upon 60 days' notice in advance of the redemption date. Such redemptions are to be paid within 30 days following the redemption date. The Trust makes investments in the Partnership and Underlying Funds through the Partnership, which are not traded in an active market and may not be redeemable. As a result, the Trust may not be able to quickly liquidate its investments in these instruments at amounts, which approximate their fair values. It is the intention of the Trust to be held by unitholders on a medium or long-term basis. The Manager monitors liquidity within the portfolio on an ongoing basis. As at December 31, 2025, 1.0% of the Trust's Net Assets Attributable to Holders of Redeemable Units were held by cash and cash equivalents (December 31, 2024: 0.04%).

The Trust has the option to pay redemptions through the issuance of Redemption Notes which are payable within five years of date of issue. As at December 31, 2025, the Trust does not have any Redemption Notes outstanding.

The Trust invests directly in the Partnership and the Partnership has the ability to borrow up to 20% of its total assets for the purposes of making investments, providing cover for the writing of options, paying redemptions, working capital purposes and to maintain liquidity in accordance with its investment objective and investment strategies. The Partnership has a borrowing facility available but has not been utilized.

Other obligations of the Trust including management fees payable, expenses payable, redemptions payable, payable for investments purchased, and distributions payable, as applicable, were due within three-months from the financial reporting date. Issued redeemable units are payable on demand unless Redemption Notes are issued.

Credit risk

Credit risk is the risk that a party to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Trust. All transactions in listed securities are settled or paid for upon delivery using approved brokers. The risk of default is considered minimal, as delivery of securities sold is only made once the broker has received payment. Payment is made on a purchase once the securities have been received by the broker. The trade will fail if either party fails to meet its obligation. As at December 31, 2025 and 2024, the Trust did not have significant exposure to credit risk. The Trust has indirect exposure to credit risk through its investment in the Partnership.

(b) Fair value of financial instruments

Financial instruments measured at fair value are classified according to a fair value hierarchy that reflects the importance of the inputs used to perform each valuation. The fair value hierarchy is made up of the following levels:

Level 1 - quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;

Level 2 - inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly; and

Level 3 - inputs are unobservable for the asset or liability.

The fair value hierarchy requires the use of observable market data each time such data exists. A financial instrument is classified at the lowest level of the hierarchy for which significant input has been considered in measuring fair value. Fair values are classified as Level 1 when the related security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3. The Trust's policy is to recognize transfers into and out of the fair value hierarchy levels as of the date of the event or change in circumstances giving rise to the transfer.

The following tables illustrate the classification of the Trust's financial instruments within the fair value hierarchy as at December 31, 2025 and 2024.

December 31, 2025	Assets (Liabilities)			Total (\$)
	Level 1 (\$)	Level 2 (\$)	Level 3 (\$)	
Partnership	-	2,920,864	-	2,920,864
Total	-	2,920,864	-	2,920,864

December 31, 2024	Assets (Liabilities)			Total (\$)
	Level 1 (\$)	Level 2 (\$)	Level 3 (\$)	
Partnership	-	2,925,811	-	2,925,811
Total	-	2,925,811	-	2,925,811

(c) Structured entities

A structured entity is an entity that has been designed so that voting or similar rights are not the dominant factor in deciding who controls the entity, such as when any voting rights relate to administrative tasks only and the relevant activities are directed by means of contractual arrangements. A structured entity often has some or all of the following features or attributes:

- i) restricted activities;

- ii) a narrow and well-defined objective, such as to provide investment opportunities for investors by passing on risks and rewards associated with the assets of the structured entity to investors;
- iii) insufficient equity to permit the structured entity to finance its activities without subordinate financial support; and
- iv) financing in the form of multiple contractually linked instruments to investors that create concentrations of credit or other risks (tranches).

The Trust considers its investment in the Partnership to be an investment in an unconsolidated structured entity. The Partnership is valued as per the section on Fair Value Measurement. The change in fair value of the Partnership is included in the statement of comprehensive income (loss) in 'Change in unrealized appreciation (depreciation) on investments'. During the years ended December 31, 2025 and 2024, the Partnership did not provide financial support to unconsolidated structured entities and has no intention of providing financial or other support." after "investments."

The exposure to the investment in the Partnership at fair value as at December 31, 2025 and 2024 are presented in the following tables. This investment is included at fair value in financial assets at FVTPL in the statement of financial position. The Manager's best estimate of the maximum exposure to loss from the Trust's investment in the Partnership is the fair value below.

December 31, 2025	Investment at Fair Value (\$)	Net Asset Value (\$)	% of Net Asset Value
Portland Global Sustainable Evergreen LP Class O	2,920,864	3,905,415	74.8%

December 31, 2024	Investment at Fair Value (\$)	Net Asset Value (\$)	% of Net Asset Value
Portland Global Sustainable Evergreen LP Class O	2,925,811	3,826,412	76.5%

6. REDEEMABLE UNITS

The Trust is permitted to issue an unlimited number of redeemable units issuable in Series A, Series F and Series O, having such terms and conditions as the Manager may determine. Additional series may be offered in the future on different terms, including different fee and dealer compensation terms and different minimum subscription levels. Each unit of a series represents an undivided ownership interest in the net assets of the Trust attributable to that series of units.

The Trust's NAV per unit is determined on the last business day of each quarter at the close of regular trading on the Toronto Stock Exchange, or on such other date as determined by the Manager (each, a Valuation Date). Unitholders may redeem their units quarterly with 60 days' notice. If a unitholder redeems his or her units within the first 24 months from initial purchase, the Manager may, in its discretion, charge a redemption penalty equal to 2.5% of the NAV of such units redeemed which will be deducted from the redemption proceeds and retained by the Trust.

The Trust endeavors to invest capital in appropriate investments in conjunction with its investment objectives.

The principal difference between the series of units relates to the management fee payable to the Manager, minimum investment requirements and the compensation paid to dealers. Units of the Trust are entitled to participate in the liquidation of assets on a series basis. Units are issued as fully paid and non-assessable and are redeemable at the NAV per unit of the applicable series of units of the Trust being redeemed, determined at the close of business on the redemption date, as outlined in the offering memorandum.

Series A Units are available to investors who meet eligibility requirements and who invest a minimum of \$5,000.

Series F Units are available to investors who meet eligibility requirements and who invest a minimum of \$5,000, who participate in fee-based programs through their dealer and whose dealer has signed a Series F Agreement with the Manager, investors for whom the Trust does not incur distribution costs, or individual investors approved by the Manager.

Series O Units are available to certain institutional investors making a minimum investment of \$500,000.

The number of units issued and outstanding for the years ended December 31, 2025 and 2024 was as follows:

December 31, 2025	Beginning Balance	Units Issued Including Switches from Other Series	Units Reinvested	Units Redeemed Including Switches to Other Series	Ending Balance	Weighted Average Number of Units
Series A Units	3,761	-	-	-	3,761	3,761
Series F Units	69,907	-	-	2,507	67,400	69,533
Series O Units	4,784	-	-	1,048	3,736	4,730

December 31, 2024	Beginning Balance	Units Issued Including Switches from Other Series	Units Reinvested	Units Redeemed Including Switches to Other Series	Ending Balance	Weighted Average Number of Units
Series A Units	3,575	186	-	-	3,761	3,636
Series F Units	72,304	5,288	273	7,958	69,907	70,854
Series O Units	5,118	1	23	358	4,784	4,915

7. TAXATION

The Trust qualifies as a mutual fund trust within the meaning of the Income Tax Act (Canada) (the Tax Act).

The Trust calculates taxable and net capital gains (losses) in accordance with the Tax Act and intends to distribute sufficient net income and net realized capital gains, if any, to ensure it does not pay ordinary income tax. As a result, the Trust does not record income taxes. Since the Trust does not record income taxes, the tax benefit of capital and non-capital losses, if any, has not been reflected in the statement of financial position as a deferred income tax asset.

The taxation year-end for the Trust is December 31.

As at December 31, 2025, the Trust has \$2,174 in capital loss carry forwards and \$nil in non-capital loss carry forwards (December 31, 2024: \$12,680 capital loss carry forwards and \$nil non-capital loss carry forwards).

8. FEES AND EXPENSES

Pursuant to the offering memorandum, the Trust agreed to pay management fees to the Manager, calculated and accrued on each Valuation Date, and paid quarterly. The Manager may waive management fees at its discretion but is under no obligation to do so.

The annual management fees rate of Series A is 1.45% and for Series F is 0.45%. Management fees on Series O Units are negotiated with the Manager. Such fees are paid directly to the Manager and are not deducted from the NAV of Series O.

In addition, the Trust is responsible for, and the Manager is entitled to reimbursement for any operating expenses it incurs on behalf of the Trust, including regulatory filing fees, custodian fees, legal and audit fees, costs associated with the independent review committee, bank charges, the cost of financial reporting, expenses related to conducting unitholder meetings, costs associated with providing Fundserv access for registered dealers and all related sales taxes. The Manager also provides key management personnel to the Trust. The Manager may charge the Trust for actual time spent by its personnel (or those of its affiliates) in overseeing the day-to-day business affairs of the Trust. The amount charged for time spent by personnel is determined based on fully allocated costs and does not include a mark-up or administration fee. The Manager may absorb fund operating expenses at its discretion but is under no obligation to do so.

The Trust is also responsible for all costs associated with its creation and organization of the Trust. The Manager has paid the costs associated with the formation and creation of the Trust and the offering of units and is entitled to reimbursement from the Trust for such costs. The Trust is required to re-pay the Manager in equal installments over 60 months commencing on the next Valuation Date after the NAV reaches \$2.5 million, or at such other time or amount, as the Manager in its absolute discretion shall determine. As of December 31, 2025, \$1,539 of organization costs have been reimbursed to the Manager (December 31, 2024: \$nil).

All management fees, operating expenses and organization expenses payable by the Trust to the Manager are subject to GST and/or HST as applicable and will be deducted as an expense of the applicable series of units in the calculation of the NAV of such series of units.

9. SOFT DOLLARS

Allocation of business to brokers of the Trust is made on the basis of coverage, trading ability and fundamental research expertise. The Manager may choose to execute portfolio transactions with dealers who provide research, statistical and other similar services to the Trust or to the Manager at prices, which reflect such services (termed proprietary research). The dealers do not provide the Manager with an estimate of the cost of the research, statistical and other similar services (referred to as soft dollars).

10. RELATED PARTY TRANSACTIONS

The following table outlines the reimbursements of management fees, organization expenses and operating expenses to the Manager which were charged by the Trust during the years ended December 31, 2025 and 2024. The table includes the amount of operating expense reimbursement that was paid to affiliates of the Manager. All of the dollar amounts in the tables below exclude applicable GST and/or HST.

	Management Fees (\$)	Waived Management Fees (\$)	Operating Expenses (\$)	Organization Expenses (\$)	Absorbed Operating Expenses (\$)	Operating Expenses Reimbursed to Affiliates of the Manager (\$)
December 31, 2025	14,119	3,147	7,615	(5,220)	90,013	1,750
December 31, 2024	13,271	12,048	-	-	93,737	1,263

The Trust owed the following amounts to the Manager excluding the applicable GST and/or HST.

As at	Management Fees (\$)	Operating Expenses (\$)	Organization Expenses (\$)
December 31, 2025	3,535	3,774	13,842
December 31, 2024	627	-	20,601

The Manager and/or its affiliates and key management personnel of the Manager and their family (collectively referred to as Related Parties) may invest in units of the Trust from time to time in the normal course of business. The following table presents the number of units of the Trust held by Related Parties on each reporting date:

	December 31, 2025	December 31, 2024
Series A Units	16	16
Series F Units	580	607
Series O Units	864	1,498

11. RECONCILIATION OF NAV PER UNIT AND NET ASSETS ATTRIBUTABLE TO HOLDERS OF REDEEMABLE UNITS PER UNIT

The following tables provide a comparison of NAV per unit and net assets attributable to holders of redeemable units of the Trust as at December 31, 2025 and 2024. The difference between NAV per unit and net assets attributable to holder of redeemable units was caused by the adjustment of organizational expenses and timing adjustments of subscriptions and redemptions with December 31 trade date.

December 31, 2025	NAV per Unit (\$)	Net assets attributable to holders of redeemable units per unit (\$)
Series A Units	36.21	35.89
Series F Units	39.37	39.00
Series O Units	39.52	39.08

December 31, 2024	NAV per Unit (\$)	Net assets attributable to holders of redeemable units per unit (\$)
Series A Units	34.35	34.70
Series F Units	36.91	37.27
Series O Units	36.91	37.26

12. EXEMPTION FROM FILING

The Trust is relying on the exemption contained within National Instrument 81-106, Part 2.11 to not file its financial statements with the applicable securities regulatory authorities.

INDEPENDENT AUDITOR'S REPORT

To the Unitholders of Portland Global Sustainable Evergreen LP

Opinion

We have audited the financial statements of Portland Global Sustainable Evergreen LP (the Fund), which comprise:

- the statement of financial position as at December 31, 2025
the statement of comprehensive income (loss) for the year then ended
- the statement of changes in net assets attributable to holders of redeemable units for the year then ended
- the statement of cash flows for the year then ended

and notes to the financial statements, including a summary of material accounting policies

(Hereinafter referred to as the “financial statements”).

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at December 31, 2025, and its financial performance and its cash flow the year then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board as issued by the International Accounting Standards Board (IASB)

Basis for Opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards. Our responsibilities under those standards are further described in the “***Auditor’s Responsibilities for the Audit of the Financial Statements***” section of our auditor’s report.

We are independent of the Fund in accordance with the ethical requirements that are relevant to our audit of the financial statements in Canada and we have fulfilled our other ethical responsibilities in accordance with these requirements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other Information

Management is responsible for the other information. Other information comprises:

- the information included in the Fund commentary document.

Our opinion on the financial statements does not cover the other information and we do not and will not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit and remain alert for indications that the other information appears to be materially misstated.

We obtained the information included in the Fund commentary document as at the date of this auditor's report. If, based on the work we have performed on this other information, we conclude that there is a material misstatement of this other information, we are required to report that fact in the auditor's report.

We have nothing to report in this regard.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Fund's ability to continue as a going concern, disclosing as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Fund or to cease operations, or has no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian generally accepted auditing standards will always detect a material misstatement when it exists.

Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements.

As part of an audit in accordance with Canadian generally accepted auditing standards, we exercise professional judgment and maintain professional skepticism throughout the audit.

We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion.

The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.

- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

1. GENERAL INFORMATION

Portland Global Sustainable Evergreen LP (the Partnership) is a limited partnership established under the laws of the Province of Ontario pursuant to a limited partnership agreement dated as of February 9, 2018, as may be amended and restated from time to time. The inception date of the Partnership was July 31, 2018 for Series A and April 30, 2018 for Series F and O. Pursuant to the limited partnership agreement, Portland General Partner (Ontario) Inc. (the General Partner) is responsible for the management of the Partnership. The Director of the General Partner is Michael Lee-Chin. The General Partner has engaged the Portland Investment Counsel Inc. (the Manager) to direct the day-to-day business, operations and affairs of the Partnership, including management of the Partnership's portfolio on a discretionary basis and distribution of the units of the Partnership. The head office of the Partnership is 1375 Kerns Road, Suite 100, Burlington, Ontario L7P 4V7. These financial statements were authorized for issue by the General Partner on March 31, 2026.

The investment objective of the Partnership is to preserve capital and provide above average long-term returns. To achieve the investment objective, the Manager may invest in a portfolio of private securities, either directly or indirectly through other funds, initially consisting of:

- private equities believed to be in sustainable systems including farmland;
- private equities in renewable energy and energy efficiency;
- other equity or debt securities, a portfolio of which may have provisions resulting in equity ownership of the issuer of the debt or the underlying asset if certain events occur; and
- invest in complementary public securities, including equity securities, real estate income trusts, royalty income trusts, preferred shares, and debt securities including convertibles, corporate and sovereign debt.

To a lesser extent, derivatives may also be used on an opportunistic basis in order to meet the Partnership's investment objective. Derivatives may limit or hedge potential losses associated with currencies, specific securities, stock markets and interest rates or are used to generate income. Derivatives may include forward currency agreements and options.

In addition, the Partnership may borrow up to 20% of the total assets of the Partnership after giving effect to the borrowing.

The Partnership may invest in investment funds, mutual funds (collectively, Underlying Funds) and exchange-traded funds which may or may not be managed by the Manager or one of its affiliates or associates. The Partnership may hold cash in short-term debt instruments, money market funds or similar temporary instruments, pending full investment of the Partnership's capital and at any time deemed appropriate by the Manager.

The Partnership has no geographic, industry sector, asset class or market capitalization restrictions. There is no restriction on the percentage of the net asset value of the Partnership, which may be invested in the securities of a single issuer.

The statements of financial position of the Partnership are as at December 31, 2025 and 2024. The statements of comprehensive income (loss), changes in net assets attributable to holders of redeemable units and cash flows are for the years ended December 31, 2025 and 2024. The schedule of investment portfolio is as at December 31, 2025.

2. BASIS OF PRESENTATION

These financial statements have been prepared in compliance with IFRS Accounting Standards (IFRS) as issued by the International Accounting Standards Board (IASB). The financial statements have been prepared under the historical cost convention, as modified by the revaluation of financial assets and financial liabilities at fair value through profit or loss (FVTPL).

3. SUMMARY OF MATERIAL ACCOUNTING POLICIES

Financial instruments

(a) Classification

The Partnership classifies financial assets based on the business model used for managing such financial assets and the contractual cash flow characteristics of those financial assets. The Partnership may be divided into sub-portfolios that have different business models. Where contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding (SPPI test), the financial asset will be classified as a financial asset at amortized cost.

The Partnership recognizes financial instruments at FVTPL upon initial recognition, inclusive of transaction costs in the case of financial instruments not measured at fair value. Purchases and sales of financial assets are recognized as at their trade date. The Partnership classifies its investments in equities and fixed income securities as financial assets or financial liabilities at FVTPL. Other Underlying Funds held by the Partnership do not meet the SPPI test and therefore have been classified as financial assets at FVTPL.

All other financial assets and liabilities are recognized at amortized cost and are reflected at the amount required to be paid, discounted to reflect the time value of money when appropriate.

The Partnership's obligation for net assets attributable to holders of redeemable units does not meet the criteria for equity treatment and therefore are presented as a liability on the statement of financial position. The Partnership classifies its obligations for net assets attributable to holders of redeemable units as financial liabilities at FVTPL.

The Partnership's accounting policies for measuring the fair value of its investments are similar to those used in measuring net asset value (NAV) for unitholder transactions; except for items attributable to a difference between the valuation methodology applied under IFRS and the methodology

applied for trading purposes, the treatment of organization expenses, and/or differences in the month end NAV and financial statement date. Refer to Fair Value Measurement for a description of the methodology applied under IFRS. Organization expenses are deductible from the NAV over a five-year period commencing at such time as the Manager shall determine and such expenses were fully deductible in the first year of operations under IFRS. There is a comparison of NAV per unit and net assets attributable to holders of redeemable units per unit within note 11.

Financial assets and liabilities may be offset and the net amount reported in the statement of financial position when there is a legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

In the normal course of business, the Partnership may enter into various master netting agreements or similar agreements that do not meet the criteria for offsetting in the statement of financial position but still allow for the related amounts to be set off in certain circumstances, such as bankruptcy, certain events of default or termination of the contracts.

(b) Recognition, de-recognition and measurement

Purchases and sales of financial assets are recognized on their trade date - the date on which the Partnership commits to purchase or sell the investment. Financial assets and liabilities are initially recognized at fair value. Subsequent to initial recognition, all financial assets and liabilities at FVTPL are measured at fair value. Unrealized gains and losses arising from changes in fair value of the FVTPL category are presented in the statement of comprehensive income (loss) within 'Change in unrealized appreciation (depreciation) on investments' in the period in which they arise. Financial assets at amortized cost are subsequently measured at amortized cost, less any impairment losses. Transaction costs incurred on financial assets or liabilities at amortized cost are amortized over the life of the asset or liability.

Financial assets are de-recognized when the rights to receive cash flows have expired or the Partnership has transferred substantially all the risks and rewards of ownership. Upon disposal, the difference between the amount received and the average cost to acquire the financial asset (for financial assets at FVTPL) or amortized cost (for financial assets at amortized cost) is included within 'Net realized gain (loss) on investments' in the statement of comprehensive income (loss).

Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value of financial assets and liabilities traded in active markets (such as publicly traded marketable securities) are based on quoted market prices at the close of trading on the reporting date. The Partnership uses the last traded market price for both financial assets and financial liabilities where the last traded price falls within that day's closing bid-ask spread. In circumstances where the last traded price is not within the bid-ask spread and the difference is material, the Manager determines the point within the bid-ask spread that is most representative of fair value based on the specific facts and circumstances. If there has been no trade, the mid-price (average bid and asking price) as of the close of the business on the reporting date is used to approximate fair value. The Partnership's policy is to recognize transfers into and out of the fair value hierarchy levels as of the date of the event or change in circumstances giving rise to the transfer.

Investments held by the Partnership, in other investment funds, are valued based on the latest available net asset value of those investment funds. The Partnership reviews the details of the reported information obtained from the investment funds and considers:

- the liquidity of the investment funds or their underlying investments;
- the value date of the NAV provided;
- restrictions on redemptions;
- the basis of accounting and, in instances where the basis of accounting is other than fair value, fair value information provided by the investment funds and/or their investment managers.

The Manager has procedures to determine the fair value of securities at FVTPL for which market prices are not readily available or which may not be reliably priced. The Underlying Funds do not trade on an active market hence its fair value is determined using valuation techniques. The fair value is primarily determined based on the latest available price of the Underlying Fund as reported by the administrator of the Underlying Fund.

Revenue recognition

'Interest for distribution purposes' shown on the statement of comprehensive income (loss) represents the stated rate of interest earned by the Partnership on fixed income securities accounted for on an accrual basis, as applicable. The Partnership does not amortize premiums paid or discounts received on the purchase of fixed income securities. Interest receivable is shown separately in the statement of financial position based on the debt instruments' stated rates of interest. Dividends on equity investments are recognized as income on the ex-dividend date.

Foreign currency translation

The Partnership's subscriptions and redemptions are denominated in Canadian dollars, which is also its functional and presentation currency. Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates that transactions occur. Assets and liabilities denominated in a foreign currency are translated into the functional currency using the exchange rate prevailing at the reporting date. Foreign exchange gains and losses related to assets and liabilities at amortized cost are recognized in profit and loss and are presented as 'Foreign exchange gain (loss) on cash and other net assets' on the statement of comprehensive income (loss). Realized foreign exchange gains and losses related to investments are recognized when incurred and are presented in the statement of comprehensive income (loss) within 'Net realized gain (loss) on investments'.

'Foreign exchange gain (loss) on cash and other net assets' may arise from sale of foreign currencies, change in foreign currency denominated loans, currency gains or losses realized between trade and settlement dates on securities transactions, and the difference between the recorded amounts of dividend, interest and foreign withholding taxes and the Canadian dollar equivalent of the amounts actually received or paid.

Cash and cash equivalents

The Partnership considers highly liquid investments with maturity of three months or less at the acquisition date that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value to be cash equivalents. Cash is comprised of deposits with financial institutions.

Cost of investments

The cost of investments represents the cost for each security excluding transaction costs for investments at FVTPL. On the schedule of investment portfolio, transaction costs have been deducted in aggregate from the total cost of individual investments which includes transaction costs.

Redeemable units

The Partnership has issued multiple series of redeemable units, which are redeemable at the holder's option and do not have identical rights. Redeemable units can be put back to the Partnership at any redemption date for cash equal to a proportionate share of the Partnership NAV attributable to the unit series. Units are redeemable quarterly upon 60 days' notice subject to the redemption lock-up period which ends 180 days after the period beginning on the date that units of the Partnership were first issued to the first investor.

The redeemable units are carried at the redemption amount that is payable at the statement of financial position date if the holder exercises the right to put the units back to the Partnership.

Redeemable units are issued and redeemed at the holder's option at prices based on each Partnership's NAV per unit at the time of issue or redemption. The Partnership's NAV per unit is calculated by dividing the net assets attributable to the holders of each series of redeemable units by the total number of outstanding redeemable units of each respective series. Refer to note 6 for additional details on redeemable units.

Expenses

Expenses of the Partnership including management fees and other operating expenses are recorded on an accrual basis.

Transaction costs associated with investment transactions for financial assets and liabilities at FVTPL, including brokerage commissions, have been expensed on the statement of comprehensive income (loss).

Interest charged on margin borrowing is recorded on an accrual basis.

Organization expenses

Organization expenses including legal fees, time spent by the Manager to create the Partnership, and registration fees associated with the formation of the Partnership are recoverable from the Partnership by the Manager. The Partnership is required to re-pay the Manager in equal installments over 60 months commencing on the next valuation date after the NAV reaches \$2.5 million, or at such other time or amount as the Manager in its absolute discretion shall determine. Organization expenses are included as 'Organization expenses' on the statement of comprehensive income (loss) as they occur.

Increase (decrease) in net assets attributable to holders of redeemable units per unit

'Increase (Decrease) in Net Assets Attributable to Holders of Redeemable Units per Unit' in the statement of comprehensive income (loss) represents the Increase (Decrease) in Net Assets Attributable to Holders of Redeemable Units per Series, divided by the weighted average units outstanding of that series during the reporting period.

Distributions to unitholders

Distributions will be made to unitholders only at such times and in such amounts as may be determined at the discretion of the Manager. All distributions by the Partnership will be paid in cash.

Allocation of income and expense, and realized and unrealized gains and losses

Management fees and other costs directly attributable to a series are charged to that series. The Partnership's operating expenses, income (loss), and realized and unrealized gains and losses are generally allocated proportionately to each series based upon the relative NAV of each series.

Allocation of non-cash items on the statement of cash flows

The Partnership includes only the net cash flow impact and does not include non-cash switches between series of the Partnership that occurred during the year in 'Proceeds from redeemable units issued' or 'Amount paid on redemption of redeemable units'. For the year ended December 31, 2025, there were no non-cash switches that have been excluded from the Partnership's operation and financing activities on the statement of cash flows (December 31, 2024: \$nil).

Future accounting changes

IFRS 18 will replace IAS 1 Presentation of Financial Statements and applies for annual reporting periods beginning on or after January 01, 2027. The new standard introduces the following key new requirements:

- Entities are required to classify all income and expenses into five categories in the statement of comprehensive income (loss), namely the operating, investing, financing, discontinued operations and income tax categories. Entities are also required to present a newly defined operating profit subtotal. Entities' net profit will not change.
- Management defined performance measures (MPMs) are disclosed in a single note in the financial statements.

- Enhanced guidance is provided on how to group information in the financial statements.

In addition, all entities are required to use the operating profit subtotal as the starting point for the statement of cash flows when presenting operating cash flows under the indirect method.

The Partnership is still in the process of assessing the impact of the new standard, particularly with respect to the structure of the Funds' statements of comprehensive income (loss), statements of cash flows and the additional disclosures required for MPMs. The Partnership is also assessing the impact on how information is grouped in the financial statements.

4. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS

The preparation of financial statements requires management to use judgment in applying its accounting policies and to make estimates and assumptions about the future. The following discusses the most significant accounting judgments and estimates the Partnership has made in preparing these financial statements.

Fair value of Underlying Funds

The fair value of Underlying Funds that are not quoted in an active market is determined primarily in reference to the latest available price of such units for each Underlying Fund, as determined by the administrator of such Underlying Fund. The Partnership may make adjustments to the reported net asset value of various Underlying Funds based on considerations such as the value date of the price provided, cash flows (calls/distributions) since the latest value date, the estimated total return reported by the manager of the Underlying Fund if a price is unavailable, restrictions on redemptions and the basis of accounting, if not at fair value. The carrying values of Underlying Funds may be materially different to the values that could be realized as of the financial reporting date or ultimately realized on redemption.

Classification of financial assets and liabilities

Financial assets may be classified as financial assets at amortized cost, financial assets at FVTPL or financial assets at fair value through other comprehensive income (loss). Financial liabilities may be classified as financial liabilities at amortized cost or financial liabilities at FVTPL. In order to classify its financial assets and liabilities in accordance with IFRS 9, the Manager uses judgment to assess the business model of the Partnership and the cash flows of their financial assets and liabilities. The classification of financial assets and liabilities of the Partnership are outlined in note 3.

5. FINANCIAL INSTRUMENTS

(a) Risk management

The Partnership's investment activities may be exposed to various financial risks, including market risk (which includes price risk, interest rate risk and currency risk), concentration risk, liquidity risk and credit risk. The Partnership invests in other funds and is therefore susceptible to the market risk arising from uncertainties about future values of those Underlying Funds. The Manager makes investment decisions after an extensive assessment of the Underlying Funds, their strategies and the overall quality of the Underlying Funds' manager. All of the Underlying Funds and their underlying investments are subject to risks inherent in their industries. In the case of the Underlying Funds, established markets do not exist for these holdings, and are therefore considered illiquid. The Partnership is therefore indirectly exposed to each financial risk of the respective Underlying Fund in proportion to its investments in such Underlying Fund. The Partnership's risk management goals are to ensure that the outcome of activities involving risk is consistent with the Partnership's investment objectives and risk tolerance as per the offering memorandum. All investments result in a risk of loss of capital.

Price risk

Price risk is the risk that the fair value or future cash flows of financial instruments will fluctuate due to changes in market prices (other than those arising from interest rate risk or currency risk). Financial instruments held by the Partnership are susceptible to market price risk arising from uncertainties about future prices of the instruments.

If the price of these investments held by the Partnership on December 31, 2025 had been higher or lower by 10%, net assets attributable to holders of redeemable units of the Partnership would have been higher or lower by \$385,376 (December 31, 2024: \$382,218). Actual results may differ from this sensitivity analysis and the difference could be material. The Partnership may have indirect exposure to price risk through its investments in Underlying Funds.

Interest rate risk

Interest rate risk arises on interest-bearing financial instruments having fixed interest rates held by the Partnership, such as bonds and borrowings. The fair value and future cash flows of such instruments will fluctuate due to changes in market interest rates. As at December 31, 2025 and 2024, the Partnership did not have significant exposure to interest rate risk. The Partnership may have indirect exposure to interest rate risk through its investments in Underlying Funds.

Currency risk

Currency risk is the risk that the value of a financial instrument will fluctuate due to changes in foreign exchange rates. Securities included in the Partnership may be valued in or have exposure to currencies other than the Canadian dollar and when measured in Canadian dollars, be affected by fluctuations in the value of such currencies relative to the Canadian dollar. There was no foreign currency exposure as at December 31, 2025 and, 2024.

Concentration risk

Concentration risk arises as a result of the concentration of exposures within the same category, whether it is geographical location, asset type or industry sector. The following table presents the Partnership's exposure as a percentage of its net assets attributable to holders of redeemable units by investment as at December 31, 2025 and, 2024.

	December 31, 2025	December 31, 2024
Bonnefield Canadian Farmland LP V Class A	87.4%	87.8%
Portland Global Energy Efficiency and Renewable Energy Fund LP Class O	13.2%	12.8%
Cash and Other Net Assets (Liabilities)	(0.6%)	(0.6%)
Total	100.0%	100.0%

The Partnership has indirect exposure to concentration risk through its investments in Underlying Funds.

Liquidity risk

Liquidity risk is the risk that the Partnership, or the Underlying Funds, will encounter difficulty in meeting their obligations associated with financial liabilities. The Partnership is exposed to quarterly cash redemptions and may borrow on margin to make investments. The Partnership provides investors with the right to redeem units quarterly. Such redemptions are to be paid within 30 days following the redemption date. It is the intention of the Trust to be held by unitholders on a medium or long-term basis. The Manager monitors liquidity within the portfolio on an ongoing basis. As at December 31, 2025, the Partnership held 1.6% of the Partnership's Net Assets Attributable to Holders of Redeemable Units in cash and cash equivalents (December 31, 2024: 2.1%).

The Partnership has the option to pay redemptions through the issuance of promissory notes as detailed in the offering memorandum under Redemption Notes. As at December 31, 2025, the Partnership has not issued any Redemption Notes.

The Partnership's has investments in the Underlying Funds that are not traded in an active market and may not be redeemable. As a result, the Partnership may not be able to quickly liquidate its investments in these instruments at amounts, which approximate their fair values. In order to maintain liquidity, the Partnership may invest in complementary, more liquid, income producing public securities, including real estate income trusts, royalty income trusts, preferred shares, dividend paying equity securities and debt securities including convertibles, corporate and sovereign debt.

The Partnership is invested in a closed-end investment fund, Portland Global Energy Efficiency and Renewable Energy Fund LP (Portland GEEREF LP), and committed and invested in an unlisted investment fund, Bonnefield Canadian Farmland LP V (Bonnefield LP V). As a result, the Partnership may not be able to quickly liquidate its investment in Portland GEEREF LP and Bonnefield LP V at amounts, which approximate fair value, or be able to respond to specific events such as deterioration of creditworthiness of the issuer. The Partnership's capital commitment to Bonnefield LP V can be called within a notice period as outlined in the subscription agreement between the Partnership and Bonnefield LP V. Units in Bonnefield LP V are redeemable after three years at a redemption price calculated at 15% discount to NAV, and after eight years at a redemption price calculated at NAV. The Manager manages the capital calls through cash flow management. As at December 31, 2025, the Partnership's total commitment to Bonnefield was \$2,350,000 and has been called in full. The Partnership has indirect exposure to liquidity risk through its investment in the Underlying Funds as they may invest in portfolios that may be subject to lock-up and redemption policies, and may not be able to sell investments quickly or at fair value.

The Partnership has the ability to borrow up to 20% of the total assets of the Partnership for the purposes of making investments, providing cover for the writing of options, paying redemptions, working capital purposes and to maintain liquidity in accordance with its investment objective and investment strategies. The Partnership has a borrowing facility available, which has not been utilized.

Other obligations of the Partnership including management fees payable, expenses payable, redemptions payable, payable for investments purchased, and distributions payable, as applicable, were due within three-months from the financial reporting date. Issued redeemable units are payable on demand unless Redemption Notes are issued.

Credit risk

Credit risk is the risk that a party to a financial instrument will fail to discharge an obligation or commitment that it has entered into with the Partnership. The Partnership has indirect exposure to credit risk through its investments in Underlying Funds through their direct investments with counterparties or those investments through a portfolio with other counterparties that may not be able to fulfill contractual obligations.

The Partnership's cash accounts are maintained at financial institutions with a Standard & Poor's credit rating of AA- and A+; and therefore credit risk is deemed minimal.

(b) Fair value of financial instruments

Financial instruments measured at fair value are classified according to a fair value hierarchy that reflects the importance of the inputs used to perform each valuation. The fair value hierarchy is made up of the following levels:

Level 1 - quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date;

Level 2 - inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly; and

Level 3 - inputs are unobservable for the asset or liability.

The fair value hierarchy requires the use of observable market data each time such data exists. A financial instrument is classified at the lowest level of the hierarchy for which significant input has been considered in measuring fair value. Fair values are classified as Level 1 when the related

security or derivative is actively traded and a quoted price is available. If an instrument classified as Level 1 subsequently ceases to be actively traded, it is transferred out of Level 1. In such cases, instruments are reclassified into Level 2, unless the measurement of its fair value requires the use of significant unobservable inputs, in which case it is classified as Level 3. The Partnership's policy is to recognize transfers into and out of the fair value hierarchy levels as of the date of the event or change in circumstances giving rise to the transfer.

The following tables illustrate the classification of the Partnership's financial instruments within the fair value hierarchy as at December 31, 2025 and 2024.

December 31, 2025	Assets (Liabilities)			Total (\$)
	Level 1 (\$)	Level 2 (\$)	Level 3 (\$)	
Underlying Funds	-	-	3,853,764	3,853,764
Total	-	-	3,853,764	3,853,764

December 31, 2024	Assets (Liabilities)			Total (\$)
	Level 1 (\$)	Level 2 (\$)	Level 3 (\$)	
Underlying Funds	-	3,335,795	486,387	3,822,182
Total	-	3,335,795	486,387	3,822,182

Portland GEEREF LP is a closed-end investment fund, which intends primarily to invest in the B units of Global Energy Efficiency and Renewable Energy Fund (GEEREF), a private equity infrastructure fund of funds, investing in regional funds, providing equity or quasi equity primarily for energy efficiency and reviewable energy project in developing countries and economies in transition. Portland GEEREF LP has the same Manager and administrator as the Partnership. This investment is considered Level 3 in the fair value hierarchy because it does not allow redemptions or transfers of units prior to dissolution except in very limited circumstances. The Partnership measures Portland GEEREF LP units at the most recently published NAV per unit as reported by its administrator, considering restrictions on the Partnership's ability to redeem units of Portland GEEREF LP. If the NAV per unit of Portland GEEREF LP had been higher or lower by 10% as at December 31, 2025, the net assets attributable to holders of redeemable units of the Partnership would have been higher or lower by \$50,729 (December 31, 2024: \$48,639).

The Partnership measures Bonnefield LP V units at the most recently published NAV per unit as reported by Bonnefield, which includes annual appraisals of the underlying assets completed on a quarterly rolling basis.

Reconciliation of Level 3 Fair Value Measurement of Financial Instruments

The following table reconciles the Partnership's Level 3 fair value measurement of financial instruments for the years ended December 31, 2025 and 2024:

	December 31, 2025 (\$)	December 31, 2024 (\$)
Balance, Beginning of Period	486,387	489,359
Investment purchases during the period	-	-
Proceeds from sales during the period	(57,689)	(52,677)
Net transfers in (out) during the period	-	-
Net realized gain (loss) on sale of investments	-	-
Change in unrealized appreciation (depreciation) in value of investments	78,588	49,705
Balance, End of Period	507,286	486,387

(c) Structured entities

A structured entity is an entity that has been designed so that voting or similar rights are not the dominant factor in deciding who controls the entity, such as when any voting rights relate to administrative tasks only and the relevant activities are directed by means of contractual arrangements. A structured entity often has some or all of the following features or attributes:

- i) restricted activities;
- ii) a narrow and well-defined objective, such as to provide investment opportunities for investors by passing on risks and rewards associated with the assets of the structured entity to investors;
- iii) insufficient equity to permit the structured entity to finance its activities without subordinate financial support; and
- iv) financing in the form of multiple contractually linked instruments to investors that create concentrations of credit or other risks (tranches).

The Partnership considers its investment in Underlying Funds to be investments in unconsolidated structured entities. The change in fair value of the Partnership is included in the statement of comprehensive income (loss) in 'Change in unrealized appreciation (depreciation) of the investments.'

The Partnership's investments in Underlying Funds are subject to the terms and conditions of their respective offering documents and are susceptible to market price risk arising from uncertainties about future values. The Manager makes investment decisions after extensive due diligence on the strategy and overall quality of the Underlying Fund's manager. During the years ended December 31, 2025 and 2024, the Partnership did not provide financial support to unconsolidated structured entities and has no intention of providing financial or other support.

These investments are included at their fair value in financial assets at FVTPL in the statement of financial position. The Manager's best estimate of the maximum exposure to loss from the Partnership's investment in Underlying Funds of the fair value as at December 31, 2025 and 2024 as follows:

December 31, 2025	Investment at Fair Value (\$)	Net Asset Value (\$)	% of Net Asset Value
Portland Global Energy Efficiency and Renewable Energy Fund LP Class O	507,286	18,461,320	2.7%
Bonnefield Canadian Farmland LP V Class A	3,346,478	374,250,324	0.9%

December 31, 2024	Investment at Fair Value (\$)	Net Asset Value (\$)	% of Net Asset Value
Portland Global Energy Efficiency and Renewable Energy Fund LP Class O	486,387	16,936,441	2.9%
Bonnefield Canadian Farmland LP V Class A	3,335,795	369,636,818	0.9%

6. REDEEMABLE UNITS

The Partnership is permitted to issue an unlimited number of redeemable units issuable in Series A, Series F and Series O, having such terms and conditions as the Manager may determine. Additional series may be offered in the future on different terms, including different fee, dealer compensation terms and different minimum subscription levels. Each unit of a series represents an undivided ownership interest in the net assets of the Partnership attributable to that series of units.

The Partnership's NAV per unit is determined on the last business day of each quarter at the close of regular trading on the Toronto Stock Exchange, or on such other date as determined by the Manager (each, a Valuation Date). Unitholders may redeem their units quarterly with 60 days' notice. If a holder redeems his or her units within the first 24 months from initial purchase, the Manager may, in its discretion, charge a redemption penalty equal to 5% of the NAV of such units redeemed which will be deducted from the redemption proceeds and retained by the Partnership. If a holder redeems his or her units between 24 months and 60 months from initial purchase, the Manager may, in its discretion, charge a redemption penalty equal to 2.5% of the NAV of such units redeemed which will be deducted from the redemption proceeds and retained by the Partnership.

The Partnership endeavors to invest capital in appropriate investments in conjunction with their investment objectives. The Partnership may borrow or dispose of investments, where necessary, to fund redemptions.

The principal difference between the series of units relates to the management fee payable to the Manager, minimum investment requirements and the compensation paid to dealers. Units of the Partnership are entitled to participate in the liquidation of assets on a series basis. Units are issued as fully paid and non-assessable and are redeemable at the NAV per unit of the applicable series of units of the Partnership being redeemed, determined at the close of business on the redemption date, as outlined in the offering memorandum.

Series A Units are available to investors who meet eligibility requirements and who invest a minimum of \$10,000.

Series F Units are available to investors who meet eligibility requirements and who invest a minimum of \$10,000, who participate in fee-based programs through their dealer and whose dealer has signed a Series F Agreement with the Manager, investors for whom the Partnership does not incur distribution costs, or individual investors approved by the Manager.

Series O Units are available to certain institutional investors making a minimum investment of \$500,000.

The number of units issued and outstanding for the years ended December 31, 2025 and 2024 was as follows:

December 31, 2025	Beginning Balance	Units Issued Including Switches from Other Series	Units Reinvested	Units Redeemed Including Switches to Other Series	Ending Balance	Weighted Average Number of Units
Series A	10,453	-	-	-	10,453	10,453
Series F	12,249	-	-	-	12,249	12,249
Series O	73,435	-	-	3,697	69,738	72,851

December 31, 2024	Beginning Balance	Units Issued Including Switches from Other Series	Units Reinvested	Units Redeemed Including Switches to Other Series	Ending Balance	Weighted Average Number of Units
Series A	14,453	-	-	4,000	10,453	13,920
Series F	12,422	-	-	173	12,249	12,334
Series O	74,976	-	-	1,541	73,435	74,544

7. TAXATION

The Partnership calculates its taxable income and net capital gains (losses) in accordance with the Income Tax Act (Canada) (the Tax Act). The Partnership is not a taxable entity and is required to allocate its taxable income and net capital gains (losses) to its limited partners in accordance with the limited partnership agreement. Accordingly, the Partnership has not included a provision for taxes in the financial statements.

The Partnership may incur withholding taxes imposed by certain countries on investment income and capital gains. Such income or gains are recorded gross of withholding taxes in the statement of comprehensive income (loss). Withholding taxes are shown as a separate item in the statement of comprehensive income (loss).

The taxation year-end for the Partnership is December 31.

8. FEES AND EXPENSES

Pursuant to the offering memorandum, the Partnership agrees to pay management fees to the Manager, calculated and accrued on each Valuation Date, and paid monthly. The Manager may waive management fees at its discretion but is under no obligation to do so.

The annual management fees rate of Series A is 1.45% and for Series F is 0.45%. Management fees on Series O Units are negotiated with the Manager. Such fees are paid directly to the Manager and are not deducted from the NAV of Series O.

In addition, the Partnership is responsible for, and the Manager is entitled to reimbursement for any operating expenses it incurs on behalf of the Partnership, including regulatory filing fees, custodian fees, legal and audit fees, costs associated with the independent review committee, bank charges, the cost of financial reporting, expenses related to conducting unitholder meetings, costs associated with providing Fundserv access for registered dealers and all related sales taxes. The Manager also provides key management personnel to the Partnership. The Manager may charge the Partnership for actual time spent by its personnel (or those of its affiliates) in overseeing the day-to-day business affairs of the Partnership. The amount charged for time spent by personnel is determined based on fully allocated costs and does not include a mark-up or administration fee. The Manager may absorb fund operating expenses at its discretion but is under no obligation to do so.

The Partnership is also responsible for all costs associated with its creation and organization of the Partnership. The Manager has paid the costs associated with the formation and creation of the Partnership and the offering of units and is entitled to reimbursement from the Partnership for such costs. The Partnership is required to re-pay the Manager in equal installments over 60 months commencing on the next valuation date after the NAV reaches \$2.5 million, or at such other time or amount as the Manager in its absolute discretion shall determine. As of December 31, 2025, \$1,604 of organization costs have been reimbursed to the Manager (December 31, 2024: \$nil).

All management fees, operating expenses and organization expenses payable by the Partnership to the Manager are subject to GST and/or HST as applicable and will be deducted as an expense of the applicable series of units in the calculation of the NAV of such series of units. Note 10 includes additional disclosures in respect to the fees payable to the Manager.

9. SOFT DOLLARS

Allocation of business to brokers of the Partnership is made on the basis of coverage, trading ability, and fundamental research expertise. The Manager may choose to execute portfolio transactions with dealers who provide research, statistical and other similar services to the Partnership or to the Manager at prices, which reflect such services (termed proprietary research). The dealers do not provide the Manager with an estimate of the cost of the research, statistical and other similar services (referred to as soft dollars).

10. RELATED PARTY TRANSACTIONS

The following table outlines the reimbursements of management fees, organization expenses and operating expenses to the Manager which were charged by the Partnership during the years ended December 31, 2025 and 2024. The table includes the amount of operating expense reimbursement that was paid to affiliates of the Manager. All of the dollar amounts in the tables below exclude applicable GST and/or HST.

	Management Fees (\$)	Waived Management Fees (\$)	Operating Expenses (\$)	Organization Expenses (\$)	Absorbed Operating Expenses (\$)	Operating Expenses Reimbursed to Affiliates of the Manager (\$)
December 31, 2025	8,043	997	9,872	(3,988)	86,661	1,816
December 31, 2024	9,274	4,335	-	-	89,017	1,497

The Partnership owed the following amounts to the Manager excluding the applicable GST and/or HST.

As at	Management Fees (\$)	Operating Expenses (\$)	Organization Expenses (\$)
December 31, 2025	2,041	4,892	14,432
December 31, 2024	2,405	-	20,023

The Manager and/or its affiliates and key management personnel of the Manager and their family (collectively referred to as Related Parties) may invest in units of the Partnership from time to time in the normal course of business. As at December 31, 2025, Related Parties did not hold any Series F units of the Partnership (December 31, 2024: 1).

The Partnership invests in Portland GEEREF LP. Portland GEEREF LP has the same manager and general partner as the Partnership. Portland GEEREF LP has investments in ITM AG Investment Trust and ITM AG Investment LP, both of which are managed by the Manager.

11. RECONCILIATION OF NAV PER UNIT AND NET ASSETS ATTRIBUTABLE TO HOLDERS OF REDEEMABLE UNITS PER UNIT

The following tables provide a comparison of NAV per unit and net assets attributable to holders of redeemable units of the Partnership as at December 31, 2025 and 2024. The difference between NAV per unit and net assets attributable to holder of redeemable units was caused by the adjustment of organizational expenses and timing adjustments of subscriptions and redemptions with December 31 trade date.

December 31, 2025	NAV per Unit (\$)	Net assets attributable to holders of redeemable units per unit (\$)
Series A Units	38.38	38.15
Series F Units	41.90	41.76
Series O Units	42.06	41.88

December 31, 2024	NAV per Unit (\$)	Net assets attributable to holders of redeemable units per unit (\$)
Series A Units	36.27	36.83
Series F Units	39.14	39.87
Series O Units	39.14	39.84

12. COMMITMENTS

As of December 31, 2025, the Partnership committed to invest \$2,350,000 in Bonnefield LP V (December 31, 2024: \$2,350,000). As at December 31, 2025, the commitment has been paid in full.

13. EXEMPTION FROM FILING

The Partnership is relying on the exemption contained within National Instrument 81-106, Part 2.11 to not file its financial statements with the applicable securities regulatory authorities.
